Subject: RE: Questions - ATSDR's visit to RFAAP this month

Hey Brad!

We would really appreciate receiving guidance on how the ATSDR and VDH staff will obtain access to the RFAAP facility during the air sampling period (e.g., what forms need to be filled out ahead of time, facility contact).

Please provide us with the guidance as soon as possible.

Thank you!

Sven

Importance: High

Hey Brad!

We would really appreciate hearing whether the air sampling will occur later this month as scheduled.

We would also appreciate receiving instructions on how the ATSDR and VDH staff should obtain access to the RFAAP facility during the sampling period (e.g., what forms need to be filled out ahead of time, facility contact).

Sven

Subject: Questions - ATSDR's visit to RFAAP this month

Hi Brad,

I am the site lead for the ATSDR's public health evaluation at Radford Army Ammunition Plant (RFAAP). Sven Rodenbeck suggested I contact you directly about ATSDR's visit to RFAAP later this month to observe the air sampling demonstration at the Open Burning Grounds. As you know, ATSDR has committed to evaluate public health concerns related to air exposures from open burning at RFAAP, and the data you will be collecting are critical to our evaluation. We appreciate your allowing us to observe the sampling first-hand.

I'll be attending with LT Brad Goodwin, Ph.D., a Public Health Service Officer and environmental engineer/scientist on our technical team at ATSDR, and Ms. Ayat Abdelbaki from the Virginia Department of Health. I have a few questions related to our visit I hope you'll be able to answer.

- Will you be our main point of contact at RFAAP? When we last visited in January 2013, I worked with Jim McKenna and there was a specific format for requesting permission for site access and use of cameras on site. Is this still the case? Please let me know what information you will need and when. We would like to take some photos of the demonstration, if that would be allowed.

- We plan to arrive at the site the morning of Tuesday, September 27 and stay at least several hours. Who should we coordinate with for scheduling issues and escort/transport to the demonstration area? We will be staying in the local area and can provide contact information later.

- We hope to speak informally with Dr. Gullet and/or the sampling team to learn as much as possible during our visit. Understanding this is the planned second week of sampling, we'd like to make sure the entire team will still be there. (If it would be helpful, I can reach out to Dr. Gullet to let him know we're coming – he should be familiar with ATSDR a bit, as Brad Goodwin and I spoke with him on a conference call some time ago.)

I realize the demonstration is still a couple weeks out, but would like to get our logistics worked out to the extent possible. (I'll be out most of next week at a meeting so might not have good access to email.) Thanks for any information you can provide!

Sincerely,

Jill
